

LOCKET PHOTO GUIDE

STEP 1: Choose the image you want to store within your locket and save it on your preferred device. From a treasured loved one, to a meaningful memory, your Monica Vinader Locket will ensure it's never out of reach.

STEP 2: We recommend printing your chosen image at 2x2cm.

Please note:

- Any standard printing paper will work here, however to ensure your image is durable, we recommend printing on 180gsm-400gsm paper.

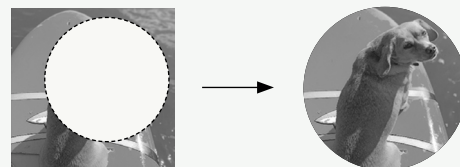

STEP 3: Print the guide and cut out your chosen locket shape from the 'Locket Photo Shapes' below

Please note:

- Before printing, set the page scale to "100%" in your printer settings
- Always print the guide onto standard A4 size paper
- Measure your chosen shape to ensure the sizing is correct and in line with the dimensions below

STEP 4: Place your chosen guide shape on top of your printed image. Once you have your shape in the desired location, trace the outline and cut along the traced line.

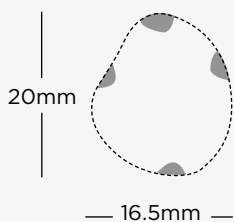

(For bonus brownie points, recycle any leftover paper).

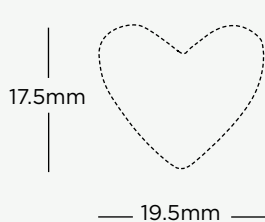

STEP 5: Finally, open your locket and slip your image inside, ensuring the edges are held safely beneath the small brackets. With a satisfying 'click!', close the pendant and you're good to go.

Your favourite memories can now be worn close to your heart - anywhere, anytime.
